

Pathstones

by Phoebe ~ Continuing Care at Home

RICHARD AND LINDA are from Bucks County, married with children, and have grandchildren nearby. They joined Pathstones when they were 71 and 68. They don't want their children to become responsible for their care as they age. They love their current home which is suitable to age in place. They also want to protect their assets and investments, making sure they don't have to drain them when future care is needed.

KATHY who is from Berks County, is a retired nurse educator and current therapy dog trainer, joined Pathstones when she was 71. She's planning ahead and looking for options that allow her to stay in her home, while being realistic about the potential for future care needs and her desire to remain independent at home. She knows the likelihood of needing care and the costs associated with not planning ahead.

JOHN AND LINDA are from Lehigh County, married with one daughter who lives out of the area. They joined Pathstones when they were 69 and 64. They love all the amenities of their home and especially their neighborhood. Both had aging parents who needed care. Making a plan for themselves both personally and financially was very important to enable them to truly enjoy everything that they have worked hard for. They know they can get the social, emotional, and health care assistance they need individually without being a burden on family, friends, or even each other as they age.
